

DATA SHEET

# Trustwave Managed Security Services

## ► SECURITY YOUR WAY

Whether you're challenged with meeting IT budget demands, fighting new threat adversaries, or are just looking for more efficiency around your compliance and security initiatives, we understand that all businesses are different, and that's why our Managed Security Services are designed for that kind of flexibility.

Threats are growing more hostile by the day and skills are at a premium. Business imperatives like BYOD, social media, web applications and big data can pose risks as well as inefficiencies if they're not properly managed. Trustwave can help you solve these challenges and close that gap – through integrated technologies, unparalleled threat intelligence and highly flexible managed services designed to meet the unique demands of your business.

### Custom Managed Services for Advanced Threats

Trustwave helps augment your security strategy in key areas to help you evolve processes, elevate data protection or advance the way you manage threats. With deep security expertise and unmatched threat intelligence, we will design a program that supports your specific needs, while giving you complete visibility and control.

### Packaged And Convenient MSS Bundles

Simplify your security program, operationalize your expenses and keep your team focused on business priorities. With packaged solution bundles, expert management and automated tools, we remove the day-to-day complexity of compliance and data protection, so you can get back to what you're passionate about – your business.

## Trustkeeper™: Unified Security and compliance platform

With Trustwave Managed Services, you get access to TrustKeeper - our powerful, cloud-based managed security and compliance platform, delivering unified and on demand access to all your technologies and services.

## Trustwave Managed Security Services Benefits

### Do Security Your Way

We know that all businesses are different, and that's why our services are designed to deliver just what you need – whether that's helping you to install, configure and tune your solution so you can drive it, or managing a complete program for you, so you can focus on your business.

### Elevate Your Security Posture

Our expertise in high-value managed security services can take you beyond the basics. Sure, we've got your managed firewall covered, but we can also help you with advanced security requirements, like threat correlation and analysis, holistic application security, self-sealing BYOD protection, advanced anti-malware and more.

### Drive Intelligence

Our analysts and engineers offer you the most advanced expertise and insight available today. Trustwave performs threat research and analysis that can help you better understand, detect and prevent security breaches. And we constantly feed the latest threat intelligence into all our services with our multi-source Global Threat Database,

### Get Sustainable

We are the experts in automation. With our cloud-based management portal TrustKeeper, you get a real-time view into the status of your programs, access to all your managed services, and you can make support requests, see event history, run reports and manage your account, all through one easy-to-use dashboard.

### Scale for Growth

With a unified Trustwave Architecture we deliver, monitor and manage our own patented technologies, but we also monitor more than 500 third-party products and manage many widely-used technologies. So if you're already running them, there's no need to rip and replace.

## Managed Security Portfolio

### Managed Security Services

No matter where you're starting, from essential network protection to advanced threat intelligence, we've got you covered.

<b>Network Security</b>	<ul style="list-style-type: none"> <li>• Managed Firewall</li> <li>• Managed IDS/IPS</li> <li>• Managed UTM</li> </ul>
