

Cybersecurity Solutions

IT & Network

We know digital security isn't just about technology. It spans people, process and the intelligence and expertise you need to stay one step ahead of those who try to access your valuable data. Sure have created the finest portfolio of security products to help you to protect your business and the resources to keep you current and confident that as the landscape changes you can change with it.

Security Journey - Discovery to Optimisation

At Sure we recognise that ensuring that your business is well protected is a journey from initially understanding and discovering your network assets and vulnerabilities through to optimising and tuning your networks and IT.

Journey Stages

Discovery

We start with a programme of discovery which enables you to catalogue your digital assets and then as a part of this phase we identify vulnerabilities and serious current risks. With your involvement an assessment of this nature also helps us to plot where you are on your security journey.

Visibility

Any comprehensive protection must quickly introduce the ability to see what is happening in your IT estate, flag attacks, spot infection so that countermeasures can be taken to ensure continued security.

Roadmap

Most security programmes require change in technology, process and education, at Sure we have the experience and skill to help you create a roadmap for change in a way that allows to you run your business efficiently while the change is undertaken.

Mitigation

As you would expect the next step is to rapidly mitigate any current exposure by securing individual hazards.

Compliance

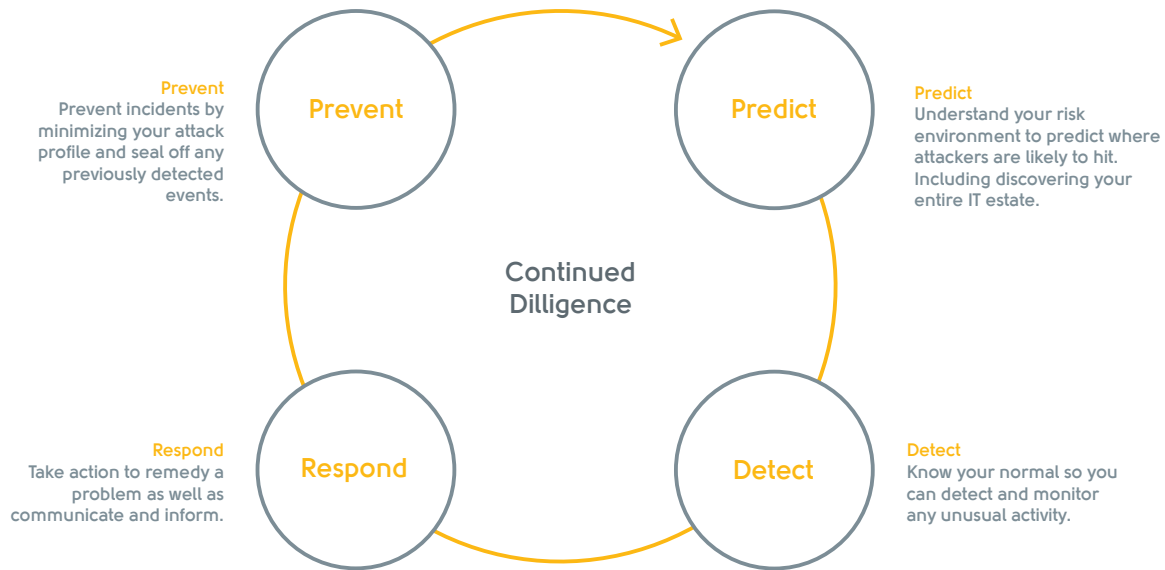

These days it isn't enough to just take the actions to protect your business. You also need to clearly demonstrate compliance and assure your business and clients that steps have been taken and protection is robust. Our Advisory consultants have the experience and qualifications to ensure that you stay secure and can verify it for compliance purposes.

Optimisation

By the time you reach this phase of the Security Journey with Sure your confidence in the security of your assets should be high and your ability to demonstrate that through certification and clear governance should be clear. But we also recognise that today's networks and IT are dynamic as business demand changes so does the shape and capability of your resources. So, as you optimise the security of your network it is also time to review and plan to ensure that you maintain your confident, protected status.

Security Journey - Continued Diligence

Because of the ever-changing landscape of security threats, addressing IT and Data Security is not a one off exercise.

A Full Range Of Products

Advisory & Design

Our advisory and design consultants can take you through your security journey, you may already have mature plans and need to verify and check with one of our experts or, you may be at the beginning and recognise that you need to understand the scope of your risk. We have the knowledge, the tools and the experience to ensure that your confidence is high and your business secure.

Trustwave

Sure has partnered with Trustwave, the leading cybersecurity service provider to exclusively offer Trustwave's full suite of security services, from network protection to SIEM and consultancy.

Mimecast

The Mimecast product suite is a powerful set of software tools that make email safer, restore trust and bolster cyber resilience. Known for safeguarding customers against dangerous email, Mimecast's expanded cloud suite enables organisations to implement comprehensive cyber resilience strategy.

DDoS

One of the main threats to hosted systems is the Distributed Denial of Service (DDoS) attack which aims to bring sites down by overwhelming them with requests. At Sure we have deployed Arbor DDoS protection that can detect and mitigate attacks before they reach your hardware keeping you systems safe and your services online.

Advisory & Design

At Sure we have a team of specialist consultants with expertise in designing and optimising customer networks including security solutions. Ask your account manager how Sure's Advisory & Design Services can help modernise your infrastructure.
