

Welcome to Sure Data Centres

Secure, resilient and globally connected

About Sure Data Centres

Located in Jersey and Guernsey, our data centres are connected to the world's largest and fastest global backbone networks, ensuring that you stay connected to your office locations and the rest of the world. The Channel Islands also provide the ideal environment to keep your most critical business data. Politically stable, inherently secure and separate from the UK & mainland Europe there isn't a better place to keep your sensitive information.

Put your customers first

Our data centres are all located on secure, island sites well above sea-level. All of our data centres offer fully redundant power distribution and time-proven reliability, speed and resilience. Our hosting facilities allow you to connect directly to one of the largest and fastest global networks. The Channel Islands are home to renowned knowledge based industries such as finance and technology making them ideal for IT infrastructure, off-shore cloud, content delivery, social networking, media streaming, e-gambling & e-gaming.

Why the Channel Islands?

- 1 Geographic location allows for higher levels of physical security compared to mainland and metropolitan areas.
- 2 Exceptional connectivity due to large scale sub-sea telecommunications infrastructure to the rest of the world.
- 3 Unparalleled interisland connectivity between Jersey and Guernsey, offering low latency resilience.
- 4 The Channel Islands are governed outside of the EEA resulting in strong privacy and data protection laws.
- 5 Sure Data Centres are well prepared for GDPR, simplifying compliance across borders.
