These connections link multiple locations together in a network managed by Sure.

A —— Sure MPLS Network —— **C**
B —— —— **D**

Access choices to meet your needs

Ethernet

» Various bandwidth options from 2Mbps up to 10Gbps

» Point-to-point and multi-point capability (VPLS & MPLS)

» Full QoS (Quality of Service) support with flexible and burstable product features

» Resilience using two diverse connections to your premises

» Fractional Ethernet services available, should standard Ethernet 10Mbps, 100Mbps or 1Gbps be too much or not enough capacity

Dedicated Internet Access

» Enterprise class, high capacity and highly resilient internet (IP) feeds

» Services are available in various bandwidth options from 2Mbps up to 10Gbps

» Flexibility through burstable bandwidth options

» Provision of DDoS (Distributed Denial of Service) Protection

Broadband

» ADSL, VDSL or Fibre broadband services with business class service

Advisory & Design

At Sure we have a team of specialist consultants with expertise in designing and optimising customer networks including internet and Ethernet solutions. Ask your account manager how Sure's Advisory & Design Services can help modernise your infrastructure.
