Anti Virus/Anti Malware					✓	✓
Web Filtering				✓	✓	✓

\* Remote View only available through SDK

\*\* If devices are purchased via the Apple DEP programme

# SOTI Functionality Matrix – what does what?

**Kiosk Mode:** limits the devices to using predefined and preapproved apps. Administrators can create a customised screen and interface for the device, as well as defining the hours the Kiosk Mode operates. Ideal for defining what apps and interface a device shows and what is accessible during working hours.

**Silent Deployment of Applications:** enables administrators to push apps and app updates out to devices without end user interaction. Ideal for app updates and remote deployment of apps.

**AD (Active Directory) Integration:** as the name suggests, this allows integration and customised connections to Active Directory, Open Directory, Domino and other LDAP servers.

**Password Policies:** forgotten passwords? Changing passwords? Are passwords even required? Password Policies allows you to determine what users can and cannot do with or without passwords, and recover lost passwords without administrator assistance if you allow them.

**OTA WiFi policies:** preconfigure and remotely deploy WiFi network settings and passwords to devices. Ideal for preconfiguring frequently visited venues, preconfiguring large groups all requiring WiFi access and attending the same location and rebuilding devices remotely.

**OTA APN/VPN policies:** preconfigure and remotely deploy APN and VPN networks and passwords to users' devices. Ideal for deployment, updating and rebuilding devices remotely.

**Feature Control:** allows administrators to manage access to select features such as Bluetooth, memory cards, cameras and sync controls. Feature Control is an ideal way to control what data can be transferred on and off devices, and how it is transferred.

**Telecom Expense Management:** a powerful platform that allows you to set rules around how, where and when users can access calling minutes, SMS and data. Policies can be deployed by user, department or seniority, with restrictions being possible by time or geographic location. This is the ideal tool to control and advise users of their roaming expenses, phone call and data plans and usage.

**Remote Wipe:** lost a device? No problem – Remote Wipe enables you to erase all data and content on the device over the air and lock the device down. Ideal for managing your business data and content in the event of device loss.

**GPS Services/Tracking:** allows you to set rules and policies dependant on where or what your users' actions or activities are. Gives you complete roaming control, enabling you to set your own roaming zones and areas. Actions such as preventing phone use while driving or when in sensitive areas (eg: fuel depots) are enabled via this feature. Can also replace dedicated GPS tracking devices. Ideal for setting geographic or physical activity based policies.

**Secure Content Locker:** distribute sensitive documents and data securely and efficiently via the Secure Content Locker. Distribution can be controlled via role, seniority, geographic location and even time-based controls. Ideal for ensuring your documents are only seen and distributed to who, when and where you want.

**Application Catalogue:** ensure your users only access the apps you want, when you want and where you want. This feature allows you to create approved lists of authorised apps and prevent users from downloading and using unauthorised apps. Ideal for ensuring users are accessing and installing only the apps you approve and allow them to use.

**Reporting:** easily track and view how and where your users are accessing their data and minutes. Ideal for creating customised reports allowing you to drill down by device and by user, and to gain insight into how devices are being used - along with the associated costs.

**Anti-Virus/Anti-Malware:** similar to desktop based antivirus and anti-malware applications, configure your devices, apps and content to be scanned anywhere from once a month to every two minutes. Policies can be set to quarantine infected files and folders, which can then be administered and managed remotely.

**Web Filtering:** determines which web pages are safe and which are not, and the creation of whitelisted websites. If a user stumbles across a web site that is blocked by the filter, they are then redirected to a predetermined safe site. Ideal for ensuring your devices are not accessing inappropriate web content or potential harmful websites.

**Phone Call Policies:** set your own policies on inbound and outbound phone calls. Create whitelists of callable phone numbers, countries and locations, or block specific numbers from calling your users. Ideal for managing costs and access to services such as premium rate numbers and international calls and for preventing unwanted phone calls.

## About Sure International

### A team built around you...

Sure supplies telecommunication services in three major offshore jurisdictions: Guernsey, Jersey and the Isle of Man. Sure International is the corporate division of the business and specialises in offshore connectivity, enabling those companies that operate in the islands to reliably and efficiently connect and transact with their global partners.

Led by Chief Commercial Officer, Jo Cox, our dedicated team of account managers look after your business 24/7, supported by technical consultants specialising in design and a service management team to ensure ongoing operational support.

### ... backed by Batelco Group

Sure is part of the global telecoms company Batelco Group, a leading provider of communications products and services across 16 jurisdictions including the Middle East and North Africa.

Listed on the Bahrain Bourse and with a history dating back 150 years, Batelco Group provides a stable and secure foundation from which we can continue to make significant investments in the Channel Islands and Isle of Man.

Importantly, Batelco Group's values align closely with our own at Sure, focusing on the delivery of innovation, value and customer service excellence, making Batelco and Sure the perfect combination of global experience and local know-how.
